## PROFESSIONAL ACHIEVEMENTS

I, Prof. M.H. Beg, graduated from K G Medical College, Lucknow (Now K.G. Medical University) in 1976 & thereafter I got selected at PGIMER Chandigarh, from where I obtained MS.(Gen. Surgery) & MCh (CTVS). I also passed the National Board examinations leading to the award of MNAMS (DNB) in Gen. Surgery & cardiothoracic surgery in the year 1980 & 1982 respectively.

I joined the Dept. of Surgery in Jan. 1983 & immensely contributed to the development of General & cardiothoracic surgery. I have been an academic enthusiast in surgery for nearly four decades. As a Chairman D/O Surgery, Director Centre of Cardiology & Cardiovascular research, Dean F/o Medicine, & as Principal, JN Medical college & Z A Dental College A M U Aligarh, I have implemented very successful Clinical Governance programs & brought into focus the processes & outcome measures leading to better patient care & training of Medical students. I also held several Academic /administrative positions in the university & outside the University. I had great contribution in the revival, development and maintenance of Centre of Cardiology and Cardiovascular Research in J.N. Medical College, A.M.U., Aligarh as its Director. Nowadays, other than non-invasive investigations, we are doing permanent Pacemaker implantation quite frequently and are having highly modernized and state-of-the-art Cardiac Cath-lab.

**I single handedly established and developed Division of Cardiothoracic and Vascular Surgery from a scratch in the Department of Surgery & transformed into a full-fledged department of Cardiothoracic and Vascular Surgery in October 2012.**

At the moment all types of closed cardiac, Open Heart operation, pulmonary, esophageal, vascular operations and Endoscopic procedures are being performed routinely. Till date, nearly **five thousands procedures have been carried out** with excellent outcome. Out of these, approximately **one thousand are closed cardiac and vascular operations including open heart operations**. In spite of all limitations, particularly financial, where government has to play a vital role, I am quite hopeful to transform it to an Open Heart Surgery Centre (Comprehensive Cardiac Care Centre) in near future.

I am the recipient of many awards & fellowships at International & national arenas like FICA, FICS & FIACS .
