The GATE Score is calculated using the following formula:

\[
\text{GATE Score} = S_t + (S_s - S_t) \frac{(M - M_s)}{(M - M_r)}
\]

where,

- \( M \) is the marks obtained by the candidate in the paper, mentioned on this scorecard,
- \( M_s \) is the qualifying mark for general category candidate in the paper,
- \( M_r \) is the mean of marks of top 0.1% or top 10 (whichever is larger) of the candidates who appeared in the paper, (in case of multi-session papers including all sessions)
- \( S_t = 350 \) is the Score assigned to \( M_s \)
- \( S_s = 900 \) is the Score assigned to \( M_r \)

In the GATE 2015 score formula, \( M_r \) is usually 25 marks (out of 100) or \( \mu + \sigma \), whichever is greater. Here \( \mu \) is the mean and \( \sigma \) is the standard deviation of marks of all candidates who appeared in the paper.

Qualifying in GATE 2015 does not guarantee either an admission to a post-graduate program or a scholarship/assistantship. Admitting institutes may conduct further tests and interviews for final selection.
