1. Windows start from sill level and finish at lintel level.
2. Doors start from plinth level and finish at lintel level.
3. Parapet wall starts above slab.
4. Wall thickness = 200 to 100 mm.
5. In case of steps, we see tread in plan which is 300mm wide.
6. In case of Risers, we see them in elevation = 150mm.
7. Risers are always one more than the number of treads.
8. Slab thickness is usually 120-150mm.
9. To develop a plan from a single line plan, add wall thickness all round the clear dimensions.
10. Stair-shades are provided at lintel level, protecting it from the lintel which is a beam provided over one type.
