Aligarh Muslim University

Aligarh Muslim University (AMU), a central university, is situated at a distance of 130 Km South-East of Delhi. It is well connected by Delhi-Kolkata Railway line and National Highway 91. It occupies a unique position amongst universities and institutions of higher learning in the country. AMU was established in 1920, evolving out of the Muhammadan Anglo-Oriental College (MAO College) which was set up in 1877 by the great visionary and social reformer, Sir Syed Ahmad Khan. Since its very inception, it has kept its doors open to the members of all communities, irrespective of caste, creed, religion and gender, from all corners of the world. AMU is the realization of the broad, far reaching and realistic goals of visionaries of the Aligarh Movement.

AMU is spread over 467.6 hectares in the city of Aligarh, nicknamed “Tala Nagri” or “The City of Locks”. The University offers more than 300 courses in the traditional and modern branches of education. It draws students from all states of India and from different countries.

The Aligarh Muslim University has more than 30000 students on its roll, 1400 teachers and about 6000 non-teaching staff. The university now has 13 faculties comprising 107 departments of studies, 7 colleges, 19 centres, 3 institutes, 2 polytechnics, 10 schools and 3 off campus AMU centres located in the cities of Malappuram (Kerala), Murshidabad (West Bengal) and Kishanganj (Bihar), respectively. A special feature of the university is its residential character with most of the students residing in 80 hostels spread over the campus. In the recent past, the University has found place amongst top 10 Indian Universities by various ranking agencies.

Department of Biochemistry

The Department of Biochemistry, established in 1962 as one of the pre-clinical departments in the Faculty of Medicine has made enormous progress in advance research and teaching. The teachers have been pursuing clinically oriented research. Since the inception of the department and till date 133 Ph.D. and 48 M.D. degrees have been awarded. The teachers have presented about 670 research papers in various scientific meets/conferences and have published over 625 research papers, mostly in reputed International Journals. The research work of the department has been widely acclaimed, both at National and International levels. The faculty members have successfully operated around 50 major research projects funded by agencies like UGC, ICMR, DAE, DBT, CSIR, UPCST etc.

About the Conference

In this conference, basic scientists and clinicians will deliberate upon the researches that have been undertaken by them and that may lead to development of affordable products such as drugs, devices, biomarkers, etc to treat and manage human diseases. The conference will provide a platform for young budding scientists and students to interact and learn from their experienced peers. With increasing trends towards alternative medicinal therapies, incorporation of naturopathic techniques in modern medicine will also be taken under consideration. The ubiquitous use of lead in everyday products and appliances, and the potential for increasing awareness about the dangers of it and other similar toxic chemicals in context of public health will also be discussed.

Broad Thrust Areas

1. Proteostasis and Enzyme Technology
2. Diagnostics and Biomarkers
3. Glycobiology and Life Style Disorders
4. Heavy Metals Toxicities
5. Immunology and Cancer Biology
6. Free Radical Biology and Neutraceuticals
7. Neurobiology and Nanomedicine
8. Unani and Ayurvedic Medicines and Chronic Human Diseases
