Tenders are invited from manufacturers or their authorized dealers for the following item on the terms and conditions mentioned below.

Quotation should reach this office on or before 16.5.2020 by 1:30 PM

**N-95 Mask**

An N-95 Mask is a respiratory protective device with high filtration efficiency to airborne particles. To provide the requisite air seal to the wearer, such masks are designed to achieve a very close facial fit.

Such mask should have high fluid resistance, good breathability (preferably with an expiratory valve), clearly identifiable internal and external faces, duckbill/ cup-shaped structured design that does not collapse against the mouth.

If correctly worn, the filtration capacity of these masks exceeds those of triple layer medical masks. Since these provide a much tighter air seal than triple layer medical masks, they are designed to protect the wearer from inhaling airborne particles.

- Shape that will not collapse easily
- High filtration efficiency
- Good breathability, with expiratory valve
- Quality compliant with standards for medical N 95 respirator:  
(a). NIOSH N-95, EN 149 FFP2, or equivalent
- Fluid resistance: minimum 80 mmHg pressure based on ASTM F1862, ISO 22609, or equivalent.
- Quality complaint with standards for particulate respirator that can be worn with full-face shield.

**Note: The Certificate of SITRA & DRDO should be submitted with the quotation and also provide the sample of Mask. Quotation without sample and Certificate will not be considered.**
