

Dear Aligs, ASAK. The AMU alumni meets that started a few years ago, have now become a regular feature. i look forward to them each year as they allow us to return to our alma mater, further solidify our network and meet friends, teachers and administrative personnel. We are able to actually see the development that is taking place on the campus. The visits energize the campus (both for students and the alumni). As alum, we are the biggest stake holders in the brand name that we carry all our lives. I have yet to see any other institution in the world, where people write their names with a suffix stating their institutional alliance, in our case, "Alig". Our youngsters look forward to meeting us, benefiting from our advise in academics, jobs, placement and the like. Frankly, they "dote" on us and our engagement with them.

See you all there.
