

AMU ALUMNI MEET 20015

My Testimonial for holding a very successful Alumni Meet.

Universities which involve their alumni in furthering scientific research and education as well as cultural and social activities, have the possibility to benefit from their resources and experiences in order to gain new impulses to improve research, teaching and university culture and infrastructure.

Being an alumnus of this university since three decades, makes me feel proud being a part of the AMU Alumni

Meet 2015 at my Alma mater where we have been nurtured and groomed up and it cannot be denied that whatever we are today is only because of our Alma mater.

We are a diverse network of a large number of alumni dispersed globally and this makes our university unlike any other in India and throughout the world. Amazingly we can find fellow alumni in a variety of fields, including

healthcare, IT consulting, logistics management, hospitality, government and private sectors, educational and research field, industrialists and contractors, and more.

To optimize the efforts of these versatile alumni community and to bring in synergy between AMU and its Alumni, an Alumni affair Committee (AAC) was set up by the Vice Chancellor in 2013. The objective of this committee is:

1. To ensure effective interface with the alumni body worldwide.
2. To facilitate fructification of ongoing initiatives.
3. To leverage the potential of international alumni network to explore new avenues for cooperation/collaboration with institutions abroad.

In concurrence and full agreement with these objectives of Alumni Affair Committee, the Alumni of Riyadh Chapter

are committed wholeheartedly for understanding the problems of their Alma mater and finding out solutions to the best of their abilities and resources. Our committed members including Dr. Nadeem Tarin, have always thought with practicality in these directions. Recently, the Vice Chancellor laid the foundation stone of a new hostel donated by Dr. Nadeem Tarin. Furthermore, the Alumni of Riyadh Chapter committed for the construction of a Riyadh Hall also which will accommodate more than 1500 students. The Vice Chancellor allotted a site for this construction near the University Riding Club and the foundation stone of this Riyadh Hall was laid during this Alumni Meet 2015.

During my speech in the session of AMU and its Alumni interface I raised some important points to our Vice Chancellor related with the hardships and problems of

NRIs in general and AMU NRI Alumni in particular for the admission of their wards at AMU.

Overall, the entire meet was meticulously designed by the Organizing Team including the Chairman Dr. Suhail Sabir.

All sessions were very meaningful and the discussions held in each session were on a bright note which could be effective in bringing our University among the top rankers.

Among the organizers, people who stole our heart and the entire show were none other than the Student Volunteers who did not leave any stone unturned for maintaining discipline and exhibiting true Alig tradition with maximum hospitality and attention to facilitate our participation.

It was concluded that there was a remarkable room for development and modernization of our Alma mater in this competitive era through printed and electronic material, websites, and events, open days, networking activities and

conferences and workshops to ensure awareness among the entire Alig fraternity and support the educational mission of our Vice Chancellor.

Dr. Mohammad Ahmad Badshah
Associate Professor
King Saud University
Riyadh, Saudi Arabia.
