Dear Faculty Members,

The outbreak of COVID-19 pandemic has thrown a challenge to entire teaching community worldwide and also Aligarh Muslim University.

I appeal to teachers of AMU to help their students in every way possible by interacting with students via email and other electronic modes. This will help our students significantly in overcoming the loss of classes and tutorials.

I suggest the following measures:

1. The teachers should make available to students the study material online. Every faculty member is provided the facility to upload study material in pdf form on their webpage of the university website. They are urged to regularly upload the study material there accordingly. Additionally, study material can also be circulated via whatsapp and/or email.
2. PPTs of the lectures which teachers use in classroom should also be made available online in the same manner.
3. The University will be uploading information related to open access material offered through online sources such as various MOOCs portals- Swayam ([swayam.gov.in](http://swayam.gov.in)), Swayam Prabha ([swayamprabha.gov.in](http://swayamprabha.gov.in)), e-PG Pathshala ([epathshala.gov.in](http://epathshala.gov.in)), National Repository of Open Educational Resources (NROER) ([nroer.gov.in](http://nroer.gov.in)) etc. on the University website.
4. In many courses, there is a requirement for project/assignment submission for internal assessment. Students should be allowed to submit the projects online.
5. All faculty members should ensure that their updated email addresses and phone numbers are available on their webpage on the university website.
