

INTRODUCTION

The workshop on “Revival of Traditional Techniques and Materials” is the first step taken by Hobbies Workshop, General Education Centre in collaboration with Heritage Cell, AMU to revive its past glory by resorting to traditional techniques and materials by conserving the invaluable heritage of the country only partially visible in form of heritage structures now under total neglect because of disuse, misuse and abuse due to public and governments apathy towards them.

OBJECTIVE

This workshop is a platform to recognize and revive the traditional knowledge system of construction and the material used in the Heritage Buildings which is getting obsolete day by day. It will help in understanding the importance of Cultural Heritage and will revive the traditional materials like lime and lime mortar and techniques like arches and vaults.

TARGET GROUP

The workshop is intended to benefit Consultants, Professionals, Engineers, Architects, Faculty, Research scholars and students working in the field of Architecture and Civil Engineering.

ACCOMODATION

Accommodation in various hotels at nominal tariffs will be arranged on advance intimation. Limited accommodation is also available in the university guest house.

THEMES

- Lime as a building material
- Preparation of lime mortar and its application
- Construction of brick Arches in lime mortar
